

Scott Klososky

Technology Speaker, Author, Consultant
Founder, Future Point of View

The Technology Integration of Humanity

A recent study shows the average age a child first sees porn is eight years old. Pause for a beat and consider the impact of that statement and know that there are many more startling facts that surround the way technology is integrating into every aspect of our personal and professional lives.

Among the millions of utopian joys gained from the internet we also find ourselves enduring much that is dystopian. The concepts discussed in Scott's most recent book, *Did God Create the Internet?*

The Impact of Technology on Humanity, are the backbone of this thought-leading keynote. One of the most speculated questions people (especially parents) have about technology is how it will impact us as a species over time.

Will all these new digital tools be good or bad for us as a species? What is technology doing to us today? Are we going to be happier? Work longer and harder, or less? Will we have less privacy? Will younger generations lose capabilities that older generations had, or will our young people be much more powerful than their predecessors?

Scott weaves together technology and philosophy into a thought-provoking talk that is sure to be mind expanding. There is a lot of flexibility to deliver content that is futuristic or relevant today.

The tone can be conversational and filled with stories, or a serious call to action to make better decisions about boundaries with digital tools. (Despite the title of Scott's book, this talk is not religious in nature.)

Best Audience: Everyone: this talk is meant to be a thought-leading exercise for anyone interested in how technology is and will continue to impact humanity. Also, this is a great topic for event that include spouses/significant others – it can be used in non-business settings.

Customizable Meter (1-10): Six (6) Meaning that almost 60% of the content for this speech is customizable. This speech can be general (changing society and humanity) or can be customized to the industry (how technology is affecting the industry and the workforce).

Best Format/Placing in a Conference: This is another very popular topic for Scott. This speech works well for a keynote to open or close the conference or event. It also works well for a dinner keynote when spouses/significant others are invited.

No matter where this speech is placed, it will really get people talking afterwards. Typically, if Q&A is used after the speech, there isn't enough time to answer all of the questions. This doesn't work as a breakout session or workshop.

Notes for the meeting planner: This is very much a thought leading speech. It looks at the impact of Humalogy® in the workplace – meaning the balance of technology and humans in our everyday lives.

With technology integrating into our everyday lives, what are the society impacts? What are the impacts on the different industries? This is a very thought-provoking speech that keeps audience's attention throughout the entire talk.

Learning Objectives Audience:

- What happening to society as machines take over jobs that humans used to do?
- Consider the impacts technology is having on our physical and psychological well-being
- Develop insight into coming trends, such as machine learning, artificial intelligence, and the singularity, which will disrupt every characteristic of what it means to be human
- Analyze why all visions of the future are dystopian; why don't we see a utopian future?
- Learn how the HUMALOGY® balance can act as a guide to integrate technology in ways that are healthy for humanity
- Ensure the digital transformation will be positive for everyone
